📍 Gopibagh 2nd Lane, Motijheel, Dhaka-1203, Bangladesh

PROFILE

Detail-oriented Junior SQA Engineer with a strong foundation in software testing methodologies, test case execution, and defect tracking. Quick learner adept at identifying bug edge cases, collaborating with development teams, and applying modern testing practices to ensure high-quality software releases.

TECHNICAL SKILLS

- **Manual Testing:** Test Case Design, Test & Bug Reporting, Regression Testing, Exploratory Testing
- **Automation Testing:** Selenium, Python
- **API Testing:** Postman, Newman
- **Tools & Version Control:** Agile, Jira, Git
- **Programming:** Java, JavaScript
- **Databases & Languages:** MySQL, Python

PROJECTS

Image Classifier

[🔗 Preview](#)

AI based deep learning web application built with TensorFlow and Streamlit that classifies images as either Cat or Dog. It uses a custom Convolutional Neural Network (CNN) built from scratch with TensorFlow using the Sequential API.

Password Generator

[🔗 Preview](#)

A lightweight web application built to generate strong, secure passwords to keep your online accounts safe. It runs in your browser, ensuring that no generated passwords or sensitive user inputs are ever transmitted over the network.

Travel Landingpage

[🔗 Preview](#)

A modern, responsive frontend landing page designed for travel and tourism websites. It features a clean layout, customized typography, hero section visuals, and responsive elements to present destination highlights effectively.
